SERVING THE OIL, PETROCHEMICALS AND MARINE INDUSTRIES

SERVICES

Daynco Limited began operations in (1997) and since then, we have progressed from being a Sub-Contractor to a Prime Contractor for the provision of Engineering Construction and operations maintenance services- onshore and offshore.

Our specialized services are contracted by companies in the oil, Gas, Petrochemicals and Marine Support industries in Trinidad and Caribbean States.

In the past years, we have developed Strategic Partnerships with International (EPC) – Companies for the construction of a Jetty and all onshore facilities at Brighton, La Brea and Ports and Terminals at Savonetta, Point Lisas.

Health, Safety and Environment (HSE) systems and practices shall all remain integral components in our business and operations, whilst, our (HSE Policies) meet clients and Statutory Standards.

Efficiency & Reliability are the “watch words” of Daynco Limited.

AUGUERCAST PILE CONSTRUCTION

DAYNCO Limited has developed a joint venture company:

DAYNCO-CASE CARIBBEAN LIMITED

Which will introduce the company’s technologies in Trinidad and Tobago and the Caricom States.

**Drilled Shafts**

With proven engineering and construction experience, flexibility and mobility we respond to clients requirements.

- Drilled Shafts- Can offer significant scheduling, economic and environmental advantages over the other deep foundation systems.
- No Pile Caps or Grade Beams necessary, Caissons tie directly to Building Columns.
- No excavation or shoring or de-watering necessary for caps or grade beams.
- Minimal Vibration or Noise Pollution.
